

EVERYTHING YOU WANTED TO
KNOW ABOUT CAMERAS BUT WERE
AFRAID TO ASK

Katherine Scott @kscottz

LESSON ONE: A CAMERA IS MORE THAN THE SUM OF ITS PARTS

CAMERAS ARE PART OF A SYSTEM FOR REPRODUCING LIGHT

SIMPLICITY HIDES COMPLEXITY

SUNSHINE AND RAINBOWS

Spectrum of Solar Radiation (Earth)

WE THEN SHOVE THAT LIGHT THROUGH SOME GLASS AND A HOLE

???

NOW TO GET THE LIGHT INTO THE COMPUTER

Bayer Filter

IR Filter

CMOS SENSOR

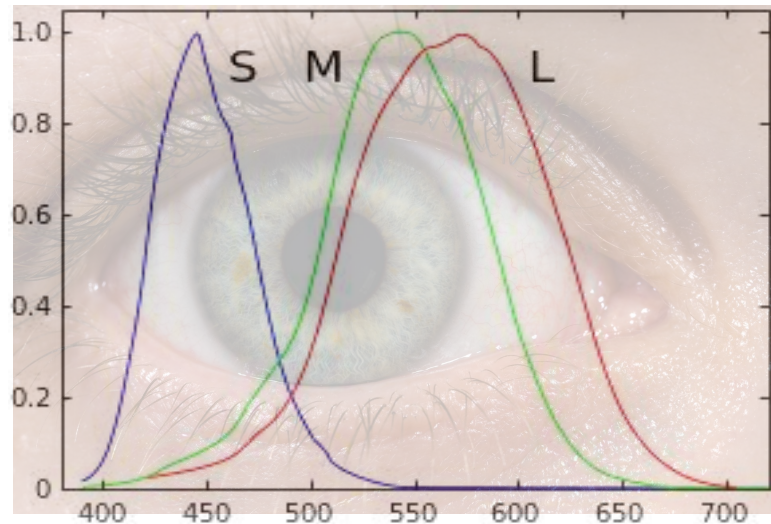

-OR-

CCD SENSOR

PHOTONS -> ELECTRONS -> BITS

FROM BITS TO YOUR BRAIN

WHAT YOU SEE IS A MASSIVE FAKE.

WHAT DOES THIS HAVE TO DO WITH PROGRAMMING?

- GARBAGE IN, GARBAGE OUT.
- PICK THE RIGHT TOOL (SENSOR/LIBRARY) FOR THE JOB
- DO IT RIGHT THE FIRST TIME
- KNOW WHAT PROBLEMS CAN BE SOLVED

LET'S START SIMPLE, WEB CAMERAS AKA UVC

| | |
|------------------------|--|
| OpenCV | Well supported. Generally well documented |
| GStreamer | Finicky |
| Robot Operating System | Installation is complex but tractable. Lot of support. |
| Command Line Treachery | Good for a single image, may not be good for video. |

FINE GRAIN CONTROL IN OPENCV
